

Deep Insights, Intelligent Outcomes.

NCMA Atlanta 2024 Emerging Small Business of the Year

CAPABILITY STATEMENT

SERVICES & CAPABILITIES

Data Management

Data/Statistical Analysis

Predictive Modeling

Case Management/Reporting

Data Analytics

HL7 FHIR

We have over 11,000 qualified Data Analytics and Cloud professionals in our internal database (this includes over 1500 with public trust, secret and top secret clearances)

WHO WE ARE

Entellimetrix helps federal agencies develop competencies for treating and managing data as a strategic asset and make data-driven decisions so that the agencies can better harness the power of data. We help clients:

- Build modern data analytics architecture
- Enable machine learning and data science
- Evolve into an insight-driven organization

WHAT WE DO

Data Integration: Our data integration services combine modern data integration technologies and techniques with proven experience so agencies can perform analysis across all their data sources, regardless of form, function, or location.

Information Delivery: Our information delivery services can visually analyze agency reporting requirements to design, develop, and implement enterprise-wide reports using web-based or dashboard reporting tools.

Data Analytics: Our data scientists can rapidly identify the factors that impact agency performance, and uncover and decipher patterns, trends, relationships, and outliers if any.

Standardized transmission of case notifications by implementing an HL7-centric data model. Enforced best practices in design and development as also adherence to database standards.

Integrated and consolidated data from disparate systems as part of the US Marine Core Community Services Data Optimization project. We put in place coding, delivery and deployment standards for technologies used.

Provided API Architecture thought leadership and subject matter expertise for the DOL OCIO Enterprise Data Platform implementation. Modernized legacy applications by using cloud technologies.

Performed an organizational assessment of the NIMHD IT Team and current infrastructure. Proposed a set of staffing and infrastructure recommendations including the adoption of public cloud.

Entellimetrix is working with the National Center for Injury Prevention and Control (NCIPC) to turn raw data into information that assists the team make better decisions for NCIPC Web efforts.

For the Unified Financial Management System (UFMS), we created SOA Enterprise Architecture Blueprint, SOA Assessment, Technical Design, Infrastructure Design, and Coding Guidelines documents.

Data Management

- Data Architecture
- Data Engineering
- Data Integration
- Data Quality
- Master Data Management
- Data Governance

Information Delivery

- On-demand Reports delivery
- Event-based Reports distribution
- Operational Reports
- Dashboards
- Scorecards
- Consolidation of Reporting systems

Data Analytics

- Analytics Strategy
- Data Science
- Machine Learning
- Data Visualization
- Data Mining

Cloud Management

- Cloud Strategy
- Cloud Adoption
- Cloud Enablement
- Cloud Migration
- Cloud-based Analytics

ALLIANCES

By leveraging our relationship with leading Data Analytics software providers, we enable agencies to choose the best solution that suits their needs.

CLIENT FEEDBACK

“Entellimetrix has been a strong partner in our transformation journey to becoming a data-driven organization. Their deliverables in data strategy, design, and development have been foundational to our success.”
